Our manufacturing quality & purpose flexibility for your success

# About the Company

**Technogroup is a company with a long tradition that has joined the metal industry in Italy in 2004.**

We are dedicated to the manufacture of metal constructions and machines, positioning ourselves on the market as a company that produces small and large series of metal processing, welding, and painting.

We offer complete metal processing using the newest laser cutting technique, fold-forming in large quantities, CNC processing, welding using the latest technology and certified personnel, as well as painting according to the client's choice.

Over the years we have been striving to reach and surpass our goals, whilst focusing on quality and maintaining the highest standards in steel manufacture and ultimate client satisfaction.

We take pride in our tradition, whereas the success lies in our zest to offer professional services and flawless metal processing.

Our philosophy is simple – we offer great flexibility in meeting and adapting to the needs of the clients.

## Our Proficiency

We offer complete metal processing using the newest laser cutting technique, foldforming in large quantities, CNC processing, welding using the latest technology and certified personnel, as well as painting.

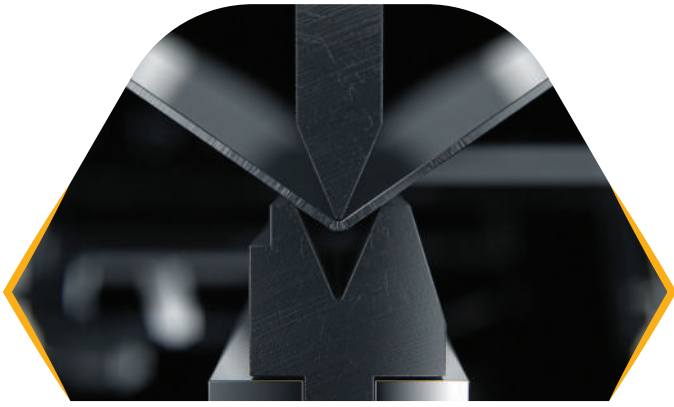

**LASER  
CUTTING**

## Certifications

- ISO 9001
- ISO 3834
- EN 1090

By using the latest fiber laser cutting technology, we have managed to achieve clearly defined results and improve the production process.

## SHEET METAL WORKING

---

Our advantage lies in the ability to foldform steel in big quantities. Our advantage lies in the ability to foldform steel in big quantities. We use specific, simple or unitary figures of lengths, up to 4,000mm.

## WELDING PROCESSING

---

We use the latest technology in the welding processes as well. The company staff consists of professional welders with long-term professional experience. The certified personnel has worked on numerous high-quality welds.

## CNC PROCESSING

---

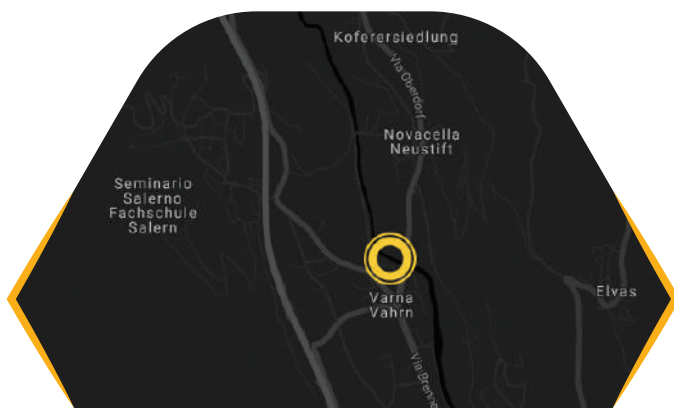

We are using CNC-Lathe and CNC-Milling machines in the detail manufacture. Thanks to our partners, we have succeeded to launch serial production and within the frames of low tolerance of materials of all kinds and quantities.

## METAL PAINTING

---

As a company with long-term experience in metal painting, we suggest wet painting and powder coating. The choice of paints is made according to the clients' preferences. The paints and the finish are chosen by the client. The client can choose between glossy, semi matte or matte color.
